

Generative Consulting

Develop key skills for your career as a consultant

If you wish to become a consultant or to build up your skills in that area, in order to help businesses and organizations lead change, this generative consulting training is for you.

Think outside the box, thanks to an intervention methodology that supports shifting people's state of mind and using collective intelligence to create innovation.

Whether you are working in a context of growth, crisis or transition, the Diamond model will offer you a powerful tool to inspire and encourage teams to cocreate an organization they want to belong to.

Aims :

Learning to fulfil your mission as a consultant with the help of the Generative approach.

Discovering and practicing essential tools and methodologies for consultants.

Encouraging leaders and their teams to welcome and enforce the changes you recommend.

Audience :

Anyone who is a support professional, coaches, consultants, facilitators, trainers, managers, business leaders.

Prerequisites :

None

Skills :

Defining the function and roles of a consultant, and differentiating them from other forms of interventions in organisations.

Understanding key concepts of the generative consulting approach

Building a consulting intervention at different stages of development of an organisation : growth, crisis, transition.

Developing your toolbox as a generative consultant in organisations.

Length :

11 days – 77 hours
